

July 19, 2017

Dear John Ewing Company Customer,

The purpose of this letter is to state John Ewing Company's policy on MSDS sheets for products we manufacture.

Our facility is audited by the National Animal Supplement Council (NASC) and adheres to a strict set of cGMP's that is in compliance with 21 CFR 589.2000/2001, which prohibits the use of specific mammalian proteins in the manufacture of feeds for ruminants. John Ewing Company does not use these mammalian proteins in the manufacture of its equine supplements.

We do not provide an MSDS for any of our finished supplement formulations, as our finished supplements are generally deemed non-hazardous based on specific ingredients or specific ingredient amounts. We do maintain MSDS sheets on the ingredients used in these formulas. We would be happy to supply you with MSDS sheets for specific ingredients, if they are requested.

If you have any questions, please contact our office.

Sincerely,

A handwritten signature in black ink, appearing to read "Kent McKendry".

Kent McKendry  
General Manager, John Ewing Company
