

Ivermax[®] (ivermectin) Equine Paste

Dewormer

Product Description

An effective, broad-spectrum paste that helps to control and kill internal parasites, including bots and the arterial stages of *Strongylus vulgaris*, with a single dose. Ivermax Equine Paste contains ivermectin 1.87% anthelmintic and boticide. Apple flavored for palatability.

Directions For Use

This syringe contains sufficient paste to treat one 1250-pound horse at the recommended dose rate of 91 mcg ivermectin per pound (200 mcg / kg) body weight. Each weight marking on the syringe plunger delivers enough paste to treat 250 pounds of body weight.

Storage

Store at room temperature (20° - 25°C).
